

**TRESIDDER
LIMITED**

Since 2019 Tresidder Limited has engaged PDG Consultants for functionality advice and subsequent customization of Microsoft Dynamics 365 Business Central ('BC') for both (i) existing Microsoft Dynamics GP clients moving to BC, and (ii) other prospects interested in BC.

Tresidder Limited's partnership with PDG Consultants has been successful in large part because of PDG's deep experience with Business Central and strong background in AL code development. With the internal consulting team of TL - responsible for core/native functionality - they worked flawlessly.

PDG's high-level knowledge of Microsoft products and specifically Business Central - merged with their commitment and creative partner+customer-centric approach - naturally leads to development of solutions both practical and appropriately structured. All experiences, throughout the course of time, have been not only pleasant but extremely educational, as well as successful.

A current prospect project involves a horticultural firm, and the proof-of-concept (including barcode distribution) developed and delivered to the end-user was nothing short of stellar and blew everyone away.

With the above background offered, Tresidder Limited recommends PDG Consultants for Business Central programming and all consulting-related requirements without hesitation.
